

# Danish Windmill Restoration Fundraising Appeal

## Help us Put a New Spin on this Old Mill

**Goal: \$200,000**

- Replacement Timbers for Sails & Wind Shaft
- Repair Brake Wheel
- Fan Tail Repair
- Replace Friction Drive Pulley for Sack Hoist

Your donation will help restore the historic 1848 Danish Windmill so it can start turning again and get back to the daily grind of being a working Mill.

Elk Horn's Danish Windmill is America's only authentic Danish Windmill. The Mill, originally built in Nørre Snede, Denmark in 1848, was brought to the United States, and rebuilt by community volunteers in 1976.

The mill was restored to working condition and operates as an educational and historical museum of Danish cultural heritage welcoming over 60,000 visitors a year.

The Mill is a very old machine and it is at a standstill for safety reasons pending the restoration of structural timbers and gears that your donation is helping to fund. Mange Tak!

## Danish Windmill
